## The Objects of the WI

To enable women who are interested in issues associated with rural life, including arts, crafts and sciences, to take an effective part in the improvements and development of the conditions of rural life, to advance their education in citizenship, in public questions both national and international, in music, drama and other cultural subjects, and to secure instruction and training for them in all branches of agriculture, handicrafts, home economics, health and social welfare. It exists to give women the opportunity of working together through the Women's Institutes organisation and of putting into practice those ideals for which it stands.
