

Our adopted ACWW project

The republic of Ghana lies in the equatorial region of Africa, 5° N 15° W

Ashaiman is a suburb of Tema, which is a harbour city in the Accra region of Ghana.

Project title

Sanitation in Ashaiman Community for Health, Productivity and Poverty Alleviation

The project will work in the Ashaiman suburb where many migrants seeking work at the port have settled. The aim is to train people to build, operate and maintain toilet and water facilities. The local government will also support the project by making available health professionals.

The project will train local artisans who can then be hired to build latrines for individual householders.

Included in the project will be education and training in health, hygiene and AIDS/HIV prevention.

Our Federation has committed to donate £3,400 to fund this project, which we hope WIs will raise on top of what they normally give to Pennies for Friendship. If you all held one fundraising event, a coffee morning, quiz night or whatever you are good at, then the target is achievable. We will have the satisfaction of knowing who is benefiting from our efforts, and can follow their progress.
